

Research Questions

If you planned the school museum project as outlined in *Learning on Display*, Chapter 3, you have prepared exhibit focus questions for your topic, along with related statements of expected student learning, student research questions, and links to your academic standards. Additional questions may have surfaced if you conducted an Affinity Diagram with students (*Learning on Display*, Chapter 3) or during the front-end evaluation (*Learning on Display*, Chapter 5). Consider providing time during the first exhibit team session for students to refine and further develop their research questions.

See Project Plan samples, which include research questions, in *Learning on Display*, Chapter 3, or at kidcurators.com.
